

Information on the COVID access rules to the Wiener Privatklinik valid from 30th April 2022

Dear patients!

Dear visitors!

In order to **ensure your safety**, as well as the safety of other patients and our staff, due to the current situation regarding the Covid 19 pandemic, **it is imperative that the following rules** and definitions for access to the clinic are **observed**. Please prove your identity at the checkpoint by means of an **official photo ID**.

1. In general, the following applies to the entire hospital area

- the obligation to wear an FFP2 mask
- keep at least 2 m distance to other persons
- The following PCR tests are accepted:
 - e.g. an official test lane, a pharmacy, a doctor's office;
 - **Antibody tests and segregation certificates are not accepted**

2. Access to the Wiener Privatklinik for patients

- **is only possible with a negative PCR test result** from a professional testing institution, which is not older than 48 hours (according to current regulation)
- **Cost of testing:**

In public test lanes and in pharmacies in Vienna, the costs for the PCR test - if they are related to an admission to a hospital - continue to be borne by the City of Vienna - the test is therefore currently free of charge for you there. We, therefore, recommend that you take advantage of this free test offer as far as possible.

For patients with Austrian supplementary insurance, the costs for a PCR test performed directly in the Vienna private hospital were paid until 31. 3. 2022, however, as of 1. 4. 2022, **these costs will unfortunately NOT be covered by the insurance for all private hospitals in Vienna and must be borne by the patient.**

For patients who wish to have the test performed for an immediately following admission (within max. 48 hours) to the Vienna Private Clinic, the following applies
a reduced price of € 35,-
and we ask you to pay this amount immediately, if possible, when the test is performed. For all other subjects the normal price according to the price list applies.

- **Test possibilities at the Wiener Privatklinik (subject of charges):**

If you were not able to take advantage of the free test offer of the City of Vienna, you can therefore continue to have the PCR test performed (for a fee) in good time (within 48 STD BEFORE your admission) **directly at the Vienna Private Clinic** in the day clinic from Monday to Friday from 8:00 - 12:00. **The test is also possible outside these opening hours - but there may be waiting times.** Please wait for your results to be sent electronically at home;
- In the event of an **acute, medically indicated emergency**, please contact the checkpoint staff directly at the entrance to the clinic

3. Access to the clinic for visitors

- **or visitors is only possible with a 2G+ certificate e.g. Digital COVID certificates** (vaccinated with a vaccine approved in Austria*1 or recovered less than 180 days ago) **AND a negative PCR test result** from a professional testing institution not older than 48 hours is possible.
- **One visitor is allowed per patient/per day.** The **maximum duration of the visit is 1 hour.** Please discuss this in good time with your confidant and, in a double room, with your room with your room neighbor in good time.

Thank you for understanding!
Your Wiener Privatklinik

***1 approved vaccines**

Comirnaty (mRNA-vaccine) - BioNTech Pfizer
Spikevax (mRNA-vaccine) - vormalis Moderna
Vaxzevria (Adenovirus-vaccine) – former AstraZeneca
Janssen (Adenovirus-vaccine) - Johnson & Johnson
